

Mikhail Korobtsov

PROJECT MANAGER · BUSINESS ANALYST

+7 921 006-53-35
@o77777o - Telegram

ABOUT

I lead projects from kickoff to launch - gathering requirements, shaping process, and keeping the team, timeline and budget in sync.

Business analysis is my foundation: I turn vague business goals into precise requirements, BPMN process maps and measurable outcomes.
With 2+ years of commercial development on React, Node.js and PostgreSQL.

T-Bank

Moscow · Mar 2021 – present

Started as a team lead in customer service, now a product business lead

- **Product Business Lead, E-signature Platform** PM May 2025 – present · Moscow
 - I own the product end to end: strategy, priorities and the project portfolio. I also lead a team of project managers.
 - We launched a new application type, and customers now wait 1 day instead of 3. That added +₽15M monthly revenue and +1.5pp conversion.
 - We reworked the mobile release process and added AI tooling, so releases ship three times faster. ₽550M NPV preserved.
- **Head of HR Process Development** PM Oct 2024 – May 2025 · Moscow
 - Set up and automated transfers and terminations for civil-contract workers.
 - Automated all quarterly reporting: instead of manual exports I built BI dashboards that refresh themselves.
 - Partial automation removed 3 steps from the process. A person now gets 20% more done: 8 operations a day instead of 6.
- **Team Lead, Premium Client Service** May 2023 – Oct 2024 · Moscow
 - Ran service for the premium segment: set up processes and standards, gathered improvements and put them into practice.
 - A team of 10–15 people.
- **Team Lead, Anti-fraud Development** May 2022 – May 2023 · St. Petersburg
 - Looked for ways to cut fraud: tested hypotheses and kept what actually worked.
 - A team of 25–30 people.
- **Team Lead, Customer Service** Mar 2021 – May 2022 · Kaliningrad
 - My first role at the bank, in customer service. Kept the team on KPIs and service quality, with 35–50 people reporting to me.

NEDOSTUPNOSTb, clothing store

Moscow · Apr 2023 – Jan 2024

Alongside my main role

- **Product Manager / Fullstack Developer** PM Apr 2023 – Jan 2024 · Moscow
 - A one-person team, both product and code. Launched a new business line from scratch.
 - Tested hypotheses, dug into UX/UI, talked to users.
 - It paid off in 8 months and is still profitable today.
